The Definitive Reference on Software Engineering

The Encyclopedia of Software Engineering 2 Volume Set

Editor-in-Chief John Marciniak
Director of Technologies for CTA

An international publishing event, *The Encyclopedia of Software Engineering*, First Edition, is the most comprehensive reference on this subject ever published. Indeed, this two volume encyclopedia not only compiles an unprecedented amount of information, but in its breadth, scope, attention to detail and organization, this work goes a long way in actually defining the field.

A truly landmark publication, *The Encyclopedia of Software Engineering* sets the standard for reference works in this exciting new field.

- Articles written by the leading authorities from around the globe.
- Over 200 major articles explore and discuss the issues and principles of this discipline.
- Biographical sketches introduce key figures in the software engineering field, including Barry Boehm, Harlan Mills, Les Belady, and Michael Jackson.

Easy to use...

- Over 500 diagrams, graphs, and charts help illustrate concepts.
- Cross references within the text alert readers where to turn to additional background on key terms as they encounter them.
- Up-to-date bibliographies are included at the end of each article.

COMPREHENSIVE COVERAGE OF THE MAJOR TOPICAL AREAS

Acquisition Management • Artificial Intelligence in Software Engineering • CASE • Computer Security • Configuration Management • Cost Estimation • Data Rights • Database Management Systems in Engineering • Design • Implementation • Maintenance • Measurement • Milestones in Software Engineering • Performance Engineering • Project Management • Quality • Quality Assurance • Requirements Analysis • Reuse • Risk Management • Safety • Software Engineering • Software Engineering Environments • Software Reliability Engineering • Software Reliability Theory • Testing

Access the world of materials property data right at your computer

The Materials Property Data Network

Use your own personal computer or workstation to tap into materials property data from around the world—quickly and effectively. Search through more than **200,000 materials records** and **2,000,000 property values** in minutes! Find data on metals, alloys, plastics, and structural ceramics plus newly added information on engineering composites.

The MPD Network is a collection of databases from sources you already know and trust. You'll find data from such producers as the Aluminum Association, ASM International, the Copper Development Association, the Materials Property Council, and the National Institute of Standards and Technology.

Dial up MPD Network on STN International® to

- search many key databases—all at the same time
- locate engineering materials and properties you could never find before, all in one place
- retrieve test data, validated data, handbook data, and data from the research literature

- use our convenient menu system to guide you through your search—it's as easy to use as an automatic bank teller machine!
